SKILLS

-Python - SQL - HTML - CSS - problem solving
- Time Management - Attention to Detail

PROJECTS

AI Powered Resume Screening System

A smart web application that analyzes resumes against job descriptions using machine learning. It provides ATS compatibility scores, highlights matching skills, and suggests improvements to help candidates better align their resumes with targeted roles.

License Number Plate Recognition & Extraction with OpenCV

Developed a computer vision-based system to detect and extract license plate numbers from vehicle images. Utilized OpenCV for image processing, contour detection, and character segmentation. Applied Optical Character Recognition (OCR) to extract and convert plate numbers into text format.

CERTIFICATES

- AI - ML Intern Cerification Provided By EduSkills
- Certification on Python Provided By Hacker Rank
